Opportunity for global minded

A high-quality programme and an international environment prepare students for responsible positions in the future. The Global Information Technology Management (GITM) Master's degree programme provides students competence for managerial, project leadership, and expert positions in design, implementation and service facilitation of information technology.

The GITM programme trains professionals to work in information resources management in international enterprises and in international project environments within the ICT-enterprises. The programme prepares students with a background in business and/or information technology or computer science, in order to become "hybrid" managers at the interface between ICT, business, and people.

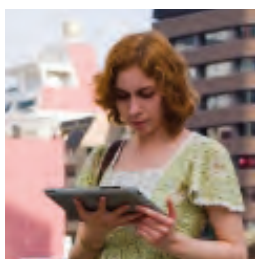

The students will get the best benefit from the GITM programme if they have worked two to three years after having completed their Bachelor's degree. Then they are able to capitalize both their background and studies by getting a job from Finnish or international companies. The successful completion of the master's degree makes a student eligible for postgraduate studies in Information Systems Science.

Welcome to the active student city of Turku

The University main campus is located in the active student city of Turku, close to the unique natural landscapes and archipelago of Southwest Finland. Turku is an active hub of business and education (pop. 200 000). The city was the European Capital of Culture 2011 and offers a host of cultural and sports activities, as well as opportunities to relax on nature trails or by the seaside.

Finland is the exotic but safe choice for your studies

Finland's national aim is to develop as a knowledge-based society, whose strengths rest on skills, knowledge and creativity. Finland has one of the world's most advanced educational systems and offers a high standard of living and quality of life. An emphasis on nature differentiates Finland from other European countries. In Finland, the air is clean and groundwater can be drunk directly from the tap. Nature is an integral part of the Finnish way of life for a very simple reason: it is everywhere!

Finland is filled with contrasts: countryside and high tech, traditions and innovations, east and west, summer and winter, midnight sun and polar night...

Finland – Country of IT innovations

... has the globe's best education and entrepreneurship (World Economic Forum 2015)

... one of the world's most dynamic economy (Grant Thornton's Global Dynamism Index for 2015).

... one of the most digital EU country (Digital Economy and Society Index 2015)

... ten Finnish startups among the Top 100 most promising companies in Europe (Red Herring 2014 Europe Top 100)

... home country of Nokia Networks, Supercell (Clash of Clans and Hay Day) and Rovio (Angry Birds)
